Front Mounted Skid Steer Magnetic Sweeper

Needs/Problems for those wanting to use in a front mounted skid steer magnetic sweeper

The Ocicat Solutions

DEBRIS CAUSING FLAT TIRES

- The flat tires on forklifts and other vehicles entering, exiting, and moving about the property and the resulting cost, interruption and delays are the problems that in most cases create the need for the use of a magnetic sweeper.

- The Ocicat was specifically designed to pick up and remove debris of this type: nails, screws, wire, discarded pieces from construction and demolition activities, bolts, nuts, pins, screwdrivers, rebar, wrenches etc.

SKID STEER FIT

- Skid steer owners want a magnetic sweeper that is easy to install and connect, and one that fits almost any skid steer on the market.

- The Ocicat easily mounts to the front of a skid steer using a universal 18" adaptor plate set at a 0-degree lead angle allowing for easy positioning of the magnet over the ground.

- Standard hydraulic fittings on the Ocicat allow for almost all skid steer auxiliary hydraulics to attach without adaptors

- Ocicat sweeping width is wider than majority of wheeled and tracked skid steers, ensuring hazards are collected by the magnet before they can cause damage

Skid Steer Magnetic Sweeper - Ocicat™ Series

Needs/Problems for those wanting to use a front mounted skid steer magnetic sweeper

The Ocicat Solutions

GROUND CONTACT

- When operating a magnetic sweeper the operator often has to feather controls and pay close attention to avoid having the magnet hit the ground and losing all of the collected debris

- The Ocicat's design allows operators to set the lift arms on the stops and this positions the magnet in the correct operating zone. The magnet is strong enough to collect debris even when it is raised high enough to avoid ground contact.

- The Wrap around feature ensures that, in the event of a ground strike, the collected debris is simply wiped to the back side of the magnet and not released onto the ground.

Skid Steer Magnetic Sweeper - Ocicat™ Series

Needs/Problems for those wanting to use a front mounted skid steer magnetic sweeper

The Ocicat Solutions

EASE OF USE

- Operators need to be able to clean collected metal debris from the magnet and into a receptacle without getting out of the skid steer.
- Large Jobsites require a fast and easy solution to collect debris that accumulates through normal operations.

- The Ocicat can perform touch free ground to bin metal debris collection. Collected metal can be lifted over a scrap bin using the skid steer lift arms and released using the auxiliary hydraulic controls from the comfort of the cab.
- The Ocicat has a powerful 76" long magnet that can cover a large plot of land quickly and efficiently the Ocicat will retain collected debris even if it hits the ground thanks to the wrap around feature.

PROFESSIONAL PERFORMANCE AND POWER

- Commercial and industrial skid steer owners and operators want a magnetic sweeper that is going to work in tough dirty conditions to ensure removal of unwanted metal debris. We know industrial and commercial users don't want to buy something that only half works

- The Ocicat is a permanently charged magnet that can pick up a 2.5" nail from a height of 13". Power will never decrease, ensuring years of use.
- Standard debris digging rakes extend the functionality of the Ocicat, allowing operators to simultaneously groom and re-surface job sites while collecting metal debris that may be below the surface.

DURABILITY

- Not only does it have to work, and be easy to use, but industrial and commercial skid steer owners and operators want a magnetic sweeper that will last as long as the skid steer

- The Ocicat is constructed of heavy-duty steel and stainless steel which can take the abuse that even the toughest job sites have to offer.
- Permanently charged C8 magnet will never need to be replaced
- Any parts the Ocicat may need are available from Bluestreak Equipment

Ocicat Specifications

Visit us at www.bluestreakequipment.com

Product Name
Ocicat - Skid Steer Magnetic Sweeper

Sweeper Width
Ocicat 76 - 76"

Magnet Housing Dimensions
Ocicat 76 - 6" H x 8" H x 76" L

Total Product Weight
Ocicat 76 - 1652 lbs

Total Shipping Weight
Ocicat 76 - 1780 lbs

Cleaning Method
Hydraulic debris release using auxiliary hydraulics.

Sweeping Height Adjustability
Continuous, using lift arms

Mounting Point
Universal skid steer adaptor plate

Magnet Type
Permanently Charged C8 Magnets

Forklift Fit
Designed to fit most skid steers, track loaders.

Maximum Lifting Height
(measures in 2 1/2" 8 penny nails)
13 inches

Construction
- Steel
- Stainless Steel

1645 Hwy 3, Delhi,
Ontario, Canada N4B 2W6
