

M530

Dexterity with High Cut Protection

APPLICATIONS

Metal Fabrication
Glass Handling
Paper Manufacturing
Plastics and Molding
Use as a Liner Glove

FEATURES

Get dexterity down to your fingertips in a light weight, form-fitting glove. You can even pick up razor-sharp parts, and know you're getting ANSI level A3 protection against cuts and abrasions. For extra comfort, we gave the M530 glove lots of stretch, using Lycra® fibers with our exclusive ATA® technology. Another benefit: The Hide-Away color makes it look like new, even after multiple washes. The M530 is often chosen as a liner under leather or driver-style gloves. This 13 gauge glove is comfortable enough for extended periods of wear and use.
