

MATA30BALGY-OERTC

Highly Abrasion Resistant

APPLICATIONS

Metal Stamping
Automotive
Public Utilities
Paper Manufacturing
Plastics and Molding
Appliance Manufacturing

FEATURES

Like ballistic nylon, our new glove features high tenacity nylon fiber. For the MATA30BALGY-OERTC we've combined this resilient material with our exclusive ATA® technology to deliver a tough, heavy weight 7 gauge glove that scores an ANSI level A4 for cut resistance. Quality features include extra reinforcement in the thumb crotch, the first place most gloves wear out. Add to that its high abrasion resistance, and you've got a long-lasting glove that wears like iron. Seamless construction means it's ambidextrous, giving you even longer product life. Proudly made in the USA.
