

# MSK-T-90

Big Protection for Big Arms

WITH THUMBHOLE

## APPLICATIONS

Aerospace  
Automotive  
Foundry  
Glass Handling  
Metal Fabrication  
Steel Mills  
Working with Ovens

## FEATURES

For tasks that put the forearm at risk, turn to the unique MSK-90 sleeve. We start with Worldwide's high performance 2-ply, 100% para-aramid MSK sleeve that delivers an all-over level of ANSI A3 cut resistance, plus moderate protection from heat. Then we reinforce the critical forearm with a split leather patch, scoring ANSI A4 for cut resistance and increasing protection against cuts, abrasions, punctures and heat. This durable, stretchable sleeve is also comfortable to wear, even over clothing. Outstanding laundry characteristics assure a long wear life and great product value.

## ATTRIBUTES

<b>STYLE</b>	Reinforced Seamless Knit
<b>GAUGE</b>	2-ply Tubular Knit
